

PLANS AND PRICING

The comprehensive database and infrastructure monitoring platform you've been searching for.

Key Features

- Badges give you a by-the-minute assessment of your organizations overall data health.
- A normalized view of your entire database ecosystem eliminates the need for specialized skills in multiple tools.
- Expert recommendations helps your team troubleshoot performance problems before they reach end-users.
- Out-of-the-box dashboards give you context into how database changes will impact your cloud and virtualized infrastructure.
- The SaaS-based tool with a centralized collector eliminates infrastructure costs and on-going maintenance.
- Actionable next steps show you exactly how to alleviate blocking and locking issues.
- Intelligent email alerts flag what's critical and find you immediately.
